COMMERCIAL MOTOR VEHICLE INVOLVEMENT CRITERIA - Answer the following to determine if the "Commercial Vehicle" fields in Section 7G must be completed.

1. Does this crash involve any of the following?
   1a. A person fatally injured; OR
   1b. A person transported for medical attention; OR
   1c. A vehicle towed due to disabling damage.
   ☐ No - No commercial vehicle fields need completion.
   ☒ Yes - Go to number 2. →
2. Examine each vehicle to determine if it is a commercial vehicle based upon the following:
   2a. A truck / cargo van with GVWR / GCVWR of more than 10,000 lbs; OR
   2b. A motor vehicle with seating for 9 or more including driver; OR
   2c. A vehicle with a hazardous materials placard.
   ☒ No - No commercial vehicle fields need completion.
   ☐ Yes - Complete Section 7G for appropriate vehicle.

MAIN NARRATIVE

On 09-12-2015 at approximately 0113 hours officers responded to the area of Highway 59 and Malcolm Mosby Drive where a vehicle vs pedestrian leaving the scene of a traffic crash report was taken.

The pedestrian was deceased upon Officers arrival and the vehicle left without reporting the collision. While on scene I took measurements for all the evidence obtained and later completed the diagram for the crash. Due to the size of the scene and the distance between the pieces of evidence the diagram had to be broken down into sections so that it can be viewed better. The diagram 1 of 4 is the overall diagram of the scene. Diagram 2 of 4 shows the overall diagram broken into sections A and B. Diagram 3 of 4 is a close up view of section A. Diagram 4 of 4 is a close up view of section B.

I used the baseline coordinate method of measuring each piece of evidence collected. The measurements are on an attached sheet. The reference point (0, 0) I used for my measurements is the south corner of a concrete culvert shown on the diagrams. Using the coning effect or departure cone way of locating an approximate area of impact I was able to determine the collision happened within the northbound outside traffic lane.

Photographs of the crash location were later taken and are attached to this report.

Vehicle 1 (V1) was later discovered to be a gold 2001Ford Escape with Missouri registration AE6A0P. The driver of V1, Oren Rinehart explained the following during an interview with Lt. Baird on 09-25-2015. Mr. Rinehart said "He was driving home in the right lane and hit something, which he thought was a deer, so he just drove home." He stated the collision happened sometime between 0030 hours and 0100 and he was traveling between 45 and 50 miles per hour.

Post collision photographs of V1 were taken and have been attached to this report.
I have completed a post collision inspection of V1. The initial damage to the V1 starts on the passenger side in between the headlight and grill. The contact damage continues up the hood angled toward the driver side before ending with the damage on the windshield. Based on the height of the front end of V1 and the height of the individual struck; his center of gravity would have caused him to be thrown up onto the hood. I believe his head struck the windshield, in front of Mr. Rinehart's field of vision, causing the "spider webbing" effect. Do to the lack of external injuries it appears the victim was carried on the hood of V1 for a distance before ending at his final resting location.

Based on the injuries to the victims left leg and the angle of the damage to the vehicle I believe the victim was either walking west across Highway 59 when he was struck or the driver of the vehicle swerved toward the east to try and avoid the collision.

Nothing else follows.
